

# Operating Systems Section 01

## CS 149

Fall 2024 3 Unit(s) 08/21/2024 to 12/09/2024 Modified 08/05/2024

### Contact Information

---

Instructor: Dr. Faramarz Mortezaie

Email: [faramarz.mortezaie@sjsu.edu](mailto:faramarz.mortezaie@sjsu.edu)

#### Office Hours

Wednesday, 11:30 AM to 12:30 PM, Online

Office hour Zoom Link:

<https://sjsu.zoom.us/j/88976984353>

Instructor: Dr. Faramarz Mortezaie

Email: [faramarz.mortezaie@sjsu.edu](mailto:faramarz.mortezaie@sjsu.edu)

### Course Information

---

Lecture Time	TTH 7:30 - 8:45 AM
Classroom:	Science Building 164
Prerequisite:	CS 146 or SE 146 (with a grade of "C-" or better) CS 47 or CMPE 102 (with a grade of "C-" or better) Computer Science, Applied and Computational Math or Software Engineering Majors only; or Instructor Consent.

### Course Description and Requisites

---

Fundamentals: Contiguous and non-contiguous memory management; processor scheduling and interrupts; concurrent, mutually exclusive, synchronized and deadlocked processes; parallel computing; files. Substantial programming project required.

Prerequisite(s): CS 47 or CMPE 102 (with a grade of "C-" or better), and CS 146 (with a grade of "C-" or better). Allowed Declared Majors: Computer Science, Applied and Computational Math, Forensic Science: Digital Evidence, or Software Engineering Majors only; or Instructor Consent.

Letter Graded

## \* Classroom Protocols

---

### Attendance

Students are expected to attend the lectures and participate in the discussion.

Instructors may drop students from class if they fail to attend respond to instructor email.

### Technical Difficulties and Internet Connection issues

Canvas AutoSaves responses a few times per minute if there is an internet connection. If your internet connection is lost, Canvas will warn you but allow you to continue working on your exam. A brief loss of internet connection is unlikely to cause you to lose your work. However, a longer loss of connectivity or weak/unstable connection may jeopardize your exam. Other technical difficulties: Immediately email the instructor a current copy of the state of your exam and explain the problem you are facing. Your instructor may not be able to respond immediately or provide technical support. However, the copy of your exam and email will provide a record of the situation.

Contact the SJSU technical support for Canvas:

Technical Support for Canvas

Email: [ecampus@sjsu.edu](mailto:ecampus@sjsu.edu)

Phone: (408) 924--2337

<https://www.sjsu.edu/ecampus/support/>

If possible, complete your exam in the remaining allotted time, offline if necessary. Email your exam to your instructor within the allotted time or soon after.

Phone: (408) 924--2337

If possible, complete your exam in the remaining allotted time, offline if necessary. Email your exam to your instructor within the allotted time or soon after.

## Program Information

---

Diversity Statement - At SJSU, it is important to create a safe learning environment where we can explore, learn, and grow together. We strive to build a diverse, equitable, inclusive culture that values, encourages, and supports students from all backgrounds and experiences.

## Course Goals

---

### Course Learning Outcomes (CLOs)

---

Upon successful completion of this course, students will be able to:

- Understand the role that the operating system software plays in the management of the various hardware subsystems of the computer
- Understand locality of memory reference and how it is used to perform effective memory hierarchy management.
- Understand the various mapping, replacement, and dynamic allocation algorithms for cache and virtual memory
- Understand the alternative CPU scheduling schemes, their tradeoffs, and their applications to other queue processing
- Appreciate the difficult tradeoffs faced when attempting to deal with the resource deadlock problem and distinguish between the different deadlock prevention and avoidance schemes and understand why and how deadlocks can still happen
- Understand software race conditions, their origin and the problems they can cause, along with knowing how to apply semaphores in software design to solve the race condition
- Understand the various issues associated with the operating system's role in performing I/O and file management.

## Course Materials

---

# Operating System Concepts

**Author:** Abraham Silberschatz

**Publisher:** Wiley

**Edition:** 10

**ISBN:** 13: 978-1119800361

## Course Requirements and Assignments

---

SJSU classes are designed such that to be successful, it is expected that students will spend a minimum of forty-five hours for each unit of credit (normally three hours per unit per week), including preparing for class, participating in course activities, completing assignments, and so on. More details about student workload can be found in [University Policy S12-3](http://www.sjsu.edu/senate/docs/S12-3.pdf) at <http://www.sjsu.edu/senate/docs/S12-3.pdf>.

[University policy F69-24](http://www.sjsu.edu/senate/docs/F69-24.pdf) at <http://www.sjsu.edu/senate/docs/F69-24.pdf> states, "Students should attend all meetings of their classes, not only because they are responsible for material discussed therein, but because active participation is frequently essential to insure maximum benefit for all members of the class. Attendance per se shall not be used as a criterion for grading."

## Descriptions of Assignments/Exams

**Exams:** Exams will be in the form of multiple choice, short answer, and programming/coding questions and will be based on the individual assignments and course material. The exams are individual work with closed books/handouts/laptops/calculators.

A course schedule is provided towards the end of this document providing a tentative schedule for Labs, Project and Exams. This schedule is subject to change with fair notice.

## Grading Information

---

### Criteria

Homework, Weekly Quiz, discussion	25%
Exam-1	25%
Exam-2	25%
Comprehensive Final Exam	25%

# Breakdown

A+	98 – 100%
A	93 – 97%
A-	90 – 92%
B+	88 – 89%
B	83 – 87%
B-	80 – 82%
C+	78 – 79%
C	73 – 77%
C-	70 – 72%
D+	68 – 69%
D	63 – 67%
D-	60 – 62%
F	59% and less

## University Policies

---

Per [University Policy S16-9 \(PDF\)](http://www.sjsu.edu/senate/docs/S16-9.pdf) (<http://www.sjsu.edu/senate/docs/S16-9.pdf>), relevant university policy concerning all courses, such as student responsibilities, academic integrity, accommodations, dropping and adding, consent for recording of class, etc. and available student services (e.g. learning assistance, counseling, and other resources) are listed on the [Syllabus Information](https://www.sjsu.edu/curriculum/courses/syllabus-info.php) (<https://www.sjsu.edu/curriculum/courses/syllabus-info.php>) web page. Make sure to visit this page to review and be aware of these university policies and resources.

## Course Schedule

---

TTH 7:30 AM - 8:45 AM

Science Building 164

When	Topic	Notes
------	-------	-------

When	Topic	Notes
<b>Lecture</b> Week-1 08/22/2024 7:30 AM - 8:45 AM	Orientation and introduction	Chapter-1  The Role of OS Resource Management
<b>Lecture</b> Week-2 08/27/2024 7:30 AM - 8:45 AM	Interrupts, DMA and Memory Devices	Chapter-1  Review of Computer Architecture
<b>Lecture</b> Week-3 09/03/2024 7:30 AM - 8:45 AM	System Calls, Linux and shell programming	Chapter-2  Review of C programming  Review of Linux Commands
<b>Lecture</b> Week-4 09/10/2024 7:30 AM - 8:45 AM	Inter process Communication	Chapter-3  Process creating using fork  exec and wait system calls
<b>Lecture</b> Week-5 09/17/2024 7:30 AM - 8:45 AM	Inter process Communication	Chapter-3  Process Communication using pipe  Process Communication using shared memory
<b>Lecture</b> Week-6 09/24/2024 7:30 AM - 8:45 AM	Review and Exam-1	<b>Note: Exam-1 Date: Sept-26 at 7:30 am</b>
<b>Lecture</b> Week-7 10/01/2024 7:30 AM - 8:45 AM	Threads and Concurrency Multithreading	Chapter-4

When	Topic	Notes
<b>Lecture</b> Week-8 10/08/2024 7:30 AM - 8:45 AM	Race Conditions – Critical section problem Semaphores	Chapter-6
<b>Lecture</b> Week-9 10/15/2024 7:30 AM - 8:45 AM	Monitors – signal and wait	Chapter-7
<b>Lecture</b> Week-10 10/22/2024 7:30 AM - 8:45 AM	Dining philosopher Problem, Producer and Consumer Problem	Chapter-7
<b>Lecture</b> Week-11 10/29/2024 7:30 AM - 8:45 AM	CPU Scheduling Multi-process Scheduling	Chapter-5
<b>Lecture</b> Week-12 11/05/2024 7:30 AM - 8:45 AM	Review and Exam-2	Note: Exam-2 Date: Nov-7 at 7:30 am
<b>Lecture</b> Week-13 11/12/2024 7:30 AM - 8:45 AM	Deadlock characterization Deadlock in Multithreaded Applications	Chapter-8
<b>Lecture</b> Week-14 11/19/2024 7:30 AM - 8:45 AM	Contiguous Memory Allocation Paging and TLB	Chapter-9

When	Topic	Notes
<b>Lecture</b> Week-15 11/26/2024 7:30 AM - 8:45 AM	Virtual Memory	Chapter-10  Note: Thursday Nov-28 No class (Thanksgiving Holiday )
<b>Lecture</b> Week-16 12/03/2024 7:30 AM - 8:45 AM	File System and Review	All Chapters
<b>Final Exam</b> Week-17 12/12/2024 7:15 AM - 9:30 AM	Closed Book Final Exam	Note: Final Exam Date is Thursday Dec-12 7:15 AM - 9:30 PM
