

Epidemiology Quiz, Chapter 2, 2/13/03

Instructions

- Please fold your paper length-wise, with the writing on the *inside* of the fold, and then write your name on the *outside* of the paper in the upper-right corner of the page. Do not write your name on the inside of the quiz. This allows for blinded evaluation.
 - For multiple choice (M/C) questions, select the best response.
 - For True/False (T/F) questions, please circle the best response.
1. (M/C) This stage of disease occurs *before* exposure to the ultimate causal agent.
 - (a) susceptibility
 - (b) subclinical
 - (c) clinical
 - (d) resolution
 2. (M/C) This stage of prevention occurs during the clinical stage of disease.
 - (a) primary
 - (b) secondary
 - (c) tertiary
 - (d) quarterly
 3. (T/F) The *epidemiologic iceberg* refers to titanic events.
 4. (T/F) A *cause* must always proceed its effect in time.
 5. (T/F) Exposure to a *necessary causal factor* always lead to disease.
 6. *Agent, host*, and _____ factors determine the level of a disease in a populations.
 - (a) biological
 - (b) person factors
 - (c) environmental
 - (d) necessary
 7. In plain English, briefly describe an important causal concepts learned from last week's reading assignment.
