SJSU_guest Wi-Fi Setup Guide

1. Select the SJSU_Guest connection from your device's Wi-Fi connection list

- 2. Under SJSU_guest, click Connect
 - a. If prompted, select that this is a **Public (unsecured) network**

- 3. To verify if your device is connected to SJSU_guest
 - a. On a Windows laptop Go to **Command Prompt**, and enter "**ipconfig** /**all**". Look for the "**Wireless LAN adapter Wi-Fi**" section. The IPv4 Address should start with 10.251.x.x, where x varies from device to device.

Nireless LAN adapter Wi-Fi:			
Connection-specific DNS Suffix .: Description Physical Address DHCP Enabled Autoconfiguration Enabled	(k.	SJSU_guest Connected, open Properties	
Link-local IPvő Address : IPv4 Address : 10.251.			Disconnect
Subnet Mask	°.	SISU_premier	

b. On an iPhone - Go to Settings, then Wi-Fi. Click the □ and scroll down to IPv4 address section. The IPv4 Address should start with 10.251.x.x, where x varies from device to device.
