Course Format

This class is a fully online asynchronous course, which means we will not meet as a class on any set day or time. You will proceed through the course at your own pace watching posted lectures and documentaries/media content, and completing homework, quizzes, exams, and writing assignments by their due dates. Lectures will be posted weekly following the course schedule. Given the flexibility of this course format, it is imperative that students manage their time effectively. I recommend completing a semester class schedule wherein you identify the days of the week and specific times on those days that you will dedicate to this course. List all due dates for every assignment so you have ample time to complete them by the due date.

Course Description

Survey of psychoactive drugs, including prescription and street drugs; social, behavioral, and physiological effects of drugs; neural mechanisms of drug action; history of drug use.

Warning: This class discusses drug use in great detail. Those with previous or existing drug problems should be aware of this and consider whether or not exposure to these discussions may serve as triggers for cravings for drug use and possible relapse. If so, you may wish to consider dropping the course. Your instructor is not responsible for any adverse reactions to the course material.

Learning Outcomes and Course Goals

Course Learning Outcomes (CLO)

Knowledge base of physiological, psychological, and behavioral effects of drugs; historical and contemporary theories of drug use and abuse; drug regulations and laws (CLO 1); research methods used in basic and applied behavioral pharmacology and in clinical evaluations of investigational new drugs (CLO 2); critical thinking skills as applied to evaluating basic and applied psychopharmacological research (CLO 3), applications of drugs in the treatment of mental disorders and other conditions (CLO 4); and ethical considerations of using human and nonhuman animals in studies investigating basic and applied psychopharmacological research (CLO 5) comprises the overall course learning outcomes.
